LOCATION
Ho Chi Minh City, Vietnam

GITHUB
github.com/hydroheo

WEBSITE
hydroheo.site

SKILLS

Networking
OSPF, VLAN (802.1Q), STP/RSTP, Static Routing, TCP/IP, DHCP, DNS

Cloud
AWS (EC2, S3, CloudFront), Docker, Nginx, Linux (Ubuntu)

Simulation
Cisco Packet Tracer, Network Modeling

Tools
Wireshark, Git, Bash, Python

EDUCATION

HUFLIT University
Bachelor of Cybersecurity
Sep 2023 — Present
Undergraduate

SOFT SKILLS

- Teamwork & Collaboration
- Problem Solving & Analytical Mindset
- Fast Learner & Technology Adaptability

PROFESSIONAL SUMMARY

Information Technology student at HUFLIT with a strong foundation in network infrastructure, routing & switching, and systems virtualization. Hands-on experience in deploying hypervisor environments, managing Windows Server/Linux operating systems, and building secure network services. Skilled in infrastructure troubleshooting and cloud integration. Seeking an Intern/Fresher position as a Network Engineer or System/Virtualization Engineer to contribute to stable enterprise operations and optimize scalable infrastructure.

PROJECTS

PROJECT 1

Completed

RADIUS Server with WiFi Marketing & Captive Portal

- Centralized AAA Architecture:** Deployed FreeRADIUS backend with MySQL/MariaDB for unified authentication, user group management, and policy control across network access points.
- WiFi Marketing & Captive Portal:** Designed interactive captive portal landing page displaying promotional banners and collecting user logins before granting internet access.
- Bandwidth & Access Control:** Implemented QoS bandwidth limits (download/upload speed), session timeouts, and voucher-based access via RADIUS reply attributes.
- Network Security & Accounting:** Enforced VLAN segmentation between guest marketing and corporate subnets; logged real-time accounting data for audit trails.

PROJECT 2

Completed

Secure Cloud Photo Sharing Website

Developed a ReactJS Single Page Application (SPA) integrated with a FastAPI backend via Nginx Reverse Proxy. Managed the JWT authentication lifecycle in the browser, securely attaching Access Tokens to Authorization headers to protect user resources.

Integrated AWS CloudFront RSA-2048 Signed URLs (60s TTL) for secure, ephemeral image rendering from private S3 buckets. Containerized the frontend using Docker & Nginx, configured internal bridge networks, and assisted in AWS EC2 deployment.
